

**A COMPLETE EDGE CLOUD SOLUTION:** on-demand bare metal and virtual machines built on layer 2 & layer 3 networking solutions in over 300 global PoPs

**FAST & FLEXIBLE SERVICE:** Deploy your digital infrastructure in hard-to-reach regions in days and weeks, not months or years.

**AI READY HYPERCONNECTED GLOBAL NETWORK:** An AI-ready low-latency SDN covering 50+ countries, and 85+ cities world-wide.

**EMERGING MARKET EXPERTISE:** A single partner to expand your digital infrastructure footprint to south-east Asia, Africa, the Middle-East and South America

**ULTRA LOW-LATENCY PERFORMANCE:** reach 85% of the world's internet users in 25 milliseconds or less

**DIRECT ACCESS TO HYPERSCALE:** On-ramps to major all major cloud providers; AWS, Microsoft Azure, Google Cloud Platform, Alibaba, Tencent Cloud

**INSTANT DEPLOYMENT:** Manage your digital infrastructure, compute, and networking through an easy-to-use web console

**BUILT FOR THE ENTERPRISE:** Your partner in solving complex infrastructure challenges. Build a secure, scalable, and reliable global digital infrastructure.

## THE VALUE OF PARTNERSHIP

**GLOBAL REACH:** Allowing for scalability & joint support, direct connections to leading cloud services providers

**SERVICE EXCELLENCE:** Network Service Provider Density, Cloud Service Provider Density, Leading Platform for Infrastructure, Bare Metal Cloud Solutions, value-added, non-competing offerings

**INTERNATIONAL SALES ALIGNMENT:** Long-term strategic options for evolving workloads, leading platform of global data center infrastructure with diverse routes

**BENEFITS TO THE CUSTOMER:** 310+ global data centers, across six continents, and 50+ metros, with scalability and support, reaching new and emerging markets, including Asia, India, Africa, South America, and the Middle East.

**PRODUCT QUALITY AND OPERATIONAL EXCELLENCE:** 10,000+ network peers, offering freedom of choice in connectivity options, across multiple global markets - including many of the world's Tier 1 carriers

**LARGEST GLOBAL DATA CENTER PLATFORM:** 300+ data centers across 50+ metros in 25+ countries, 87% owned

**AI READY FACILITIES:** Existing inventory, term-outs, land banks, tax abatement markets, high density facilities delivering air and liquid cooled capabilities today up to 70KW a rack

**DEPLOY, CONNECT, SECURE CRITICAL INFRASTRUCTURE AT ANY SCALE:** 20' year DNA in data center modularity, split stack architectures, and mix densities from a single rack, multi-MW, or built to suit

**ON RAMP TO DIGITAL ECOSYSTEMS AND CONNECTED DATA COMMUNITIES:** Direct On-Ramp Access to the hyperscalers, direct access to hundreds of carriers, Layer 2 connectivity on demand to 700+ data centers, clouds, and services via Service Fabric

**TRUSTED PLATFORM FOR PERFORMANT, RESILIENT AND SUSTAINABLE GLOBAL CAPACITY:** Compliant facilities NIST, PCI, SOC, ISO, 99.9999% Uptime 15+ years, 5+ years Energy Star Partner of the year, US-EMEA colocation centers net neutral, 6 billion in green bonds issued
