SERVICE LEVEL AGREEMENT
ZENLAYER GLOBAL ACCELERATOR

Last updated: October 7, 2026

This "Service Level Agreement – Zenlayer Global Accelerator" (hereinafter "SLA") is attached to and forms part of all executed Customer SOFs that pertain to this Service. This SLA governs the provision of Zenlayer Global Accelerator services ("Services"), as defined below. Capitalized terms shall have the meaning defined in the MSA located at https://www.zenlayer.com/msa/.

Customer agrees that by either (1) executing a Service Order Form, or (2) clicking a box indicating acceptance the Customer accepts the terms of this SLA. If the individual accepting this SLA is accepting on behalf of a company or other legal entity, such individual represents that they have the authority to bind such entity and its affiliates to these terms and conditions, in which case the term "Customer" shall refer to such entity and its affiliates.

Zenlayer reserves the right to update this SLA at any time, and the latest version posted on Zenlayer's website shall govern.

1. PRODUCT SUMMARY.

ZGA is a worldwide network acceleration platform. Relying on Zenlayer global backbone network resources, it realizes the network nearby access, and global point-to-point, point-to-multipoint interconnection. It provides high-quality network services for global customers by providing the various network solutions, including low delay, anti-jitter and packet loss control.

2. SERVICE DESCRIPTIONS.

2.1. "Unavailability" means Customer's communication attempts to pass the designated acceleration area all fail within the acceleration channel within a certain minute (i.e., the packet loss rate within the acceleration channel within one minute is 100%, subject to Zenlayer monitoring data). The unavailable minutes caused by Section 4.3 below shall be excluded.

2.2. Significant Change in Peak Bandwidth. Customer shall provide a written Peak Bandwidth Notice at least three (3) Business Days in advance to Zenlayer for approval, if Customer plans to increase or decrease the monthly peak bandwidth from last calendar month by thirty per cent (30%) or by more than one hundred (100) Mbps. If Customer fails to provide the Peak Bandwidth Notice in advance or fails to get the approval from Zenlayer, Zenlayer shall not be liable for any service availability issues caused herein.

2.3. Usage-Based Bandwidth Restriction. For usage-based billing, the peak bandwidth is capped at 100 Mbps. If Customer's actual peak bandwidth is more than 100 Mbps, Customer shall either (A) change to bandwidth-based billing, or (B) provide a written Bandwidth Support Application at least three (3) Business Days in advance to Zenlayer for approval. If Customer chooses to solution B but fails to provide the Bandwidth Support Application in advance or fails to get the approval from Zenlayer, Zenlayer shall not be liable for any service availability issues caused herein.

3. ACCEPTANCE PERIOD.

3.1. The Acceptance Period is two (2) business days for Zenlayer Global Accelerator services.

3.2. Acceptance of Services. Unless otherwise stated in the SOF, the Services will be accepted or deemed accepted as follows: (i) after Customer receives Zenlayer's delivery notification for a Service (including a Service Activation Notice), Customer will have the Acceptance Period stated above to test the Service and notify Zenlayer in writing of its acceptance or rejection of the Service; (ii) Customer may reject a Service only if it does not meet the technical specifications set out in the SOF, and any rejection notice must describe the non-conformity in reasonable detail; and (iii) if Customer rejects a Service within the Acceptance Period, Zenlayer will remedy the non-conformity and issue a new delivery notification, and this procedure will be repeated. If Customer does not notify Zenlayer of its acceptance or rejection within the Acceptance Period, or uses the Service

for production purposes, the Service is deemed accepted. Billing commences on the Service Activation Date in accordance with Sections 2.3 and 5.2 of the MSA.

4. SERVICE LEVEL GUARANTEE.

Zenlayer shall use commercially reasonable efforts to maintain a monthly availability for Service of 99.9% or greater.

4.1. Service Availability Guarantee and Service Level Credit.

If Zenlayer fails to meet the service levels set out in this SLA, except for the exclusions set out in this SLA, Customer is entitled to a Service Level Credit as set out in the table below:

SERVICE AVAILABILITY % PER CALENDAR MONTH	Unavailability Duration Approximation (for reference only)	Amount of Credit (% of MRC)
⩾ 99.9%	Up to 44 minutes	N/A
< 99.9% and ⩾ 99.0%	More than 44 minutes and up to 7 hours and 12 minutes	10%
< 99.0%	More than 7 hours and 12 minutes	20%

4.2. To submit a claim for a Service Level Credit, Customer must:

(a) Notify Zenlayer in writing (by support ticket or by email to Zenlayer's support team) within thirty (30) calendar days after the date of the event giving rise to the claim. If Customer does not notify Zenlayer within this period, Customer waives its right to a Service Level Credit for that event; and

(b) Provide Customer's name and administrative contact, the SOF or contract number, the affected Service, the date and the start and end times of the event, any trouble ticket number(s) opened for the event, and, where applicable, the origination and destination route, the source and destination IP addresses, and a traceroute from the source address.

(c) The formula for Actual Availability shall be as follows:

$$\left(\frac{T - U}{T}\right) \times 100\% = \text{Actual Availability}$$

T = Total Minutes per Month

U = Unavailability Duration (rounded up to the nearest whole minute)

(d) Customer is not entitled to a Service Level Credit if, when the claim is submitted or the credit would be applied, (i) any undisputed amount owed by Customer is past due, or (ii) the affected Service has been suspended in accordance with the Agreement or terminated.

(e) Service Level Credits apply only to the affected Service and are calculated as a percentage of the Monthly Recurring Charges ("MRC") for the affected Service stated in the applicable SOF (or, for Services billed on a usage basis, the usage charges invoiced for the affected Service) for the calendar month in which the Unavailability occurred, excluding Non-Recurring Charges and Taxes.

(f) Service Level Credits are calculated using Zenlayer's monitoring records and system logs, which are the sole and conclusive evidence of the service level achieved, absent manifest error.

(g) Service Level Credits will be applied against Customer's next invoice(s) for the affected Service after Zenlayer confirms the claim. Service Level Credits have no cash value and are not refundable or transferable. Customer may not withhold, deduct, or set off any claimed Service Level Credit against amounts owed to Zenlayer. Any Service Level Credit not applied before the affected Service terminates or expires is forfeited.

(h) The total Service Level Credits for a Service in any calendar month, for all events and under all credit tables in this SLA combined, will not exceed the highest credit percentage stated in the credit table applicable to that Service, applied to the MRC for that month.

4.3. Exclusions. Zenlayer is not responsible for, and Service Level Credits do not apply to, any network outage, service failure, or Unavailability caused by any of the following, and those periods are excluded when calculating Service availability:

(a) Scheduled Maintenance of which Customer was notified in advance, provided that a single Scheduled Maintenance window does not exceed twenty-four (24) hours, and Emergency Maintenance (each as described in the Maintenance section below);
(b) Force Majeure events, as described in Section 13.1 of the MSA;
(c) Acts or omissions of Customer, its End Users, or any person authorized by Customer, including Customer's configurations and any equipment, software, or local access facilities provided or ordered directly by Customer;
(d) Failure of power, facilities, equipment, systems, or connections not provided by Zenlayer or its Affiliates;
(e) Zenlayer's or its Affiliates' inability to access Customer's premises or equipment when access is required;
(f) Customer's failure to fulfill bandwidth-related notification or application obligations, specifically including: (i) Failure to Submit Peak Bandwidth Notice for Significant Change. If Customer plans to increase or decrease the monthly peak bandwidth from the last calendar month by 30% or by more than 100 Mbps, but fails to provide a written Peak Bandwidth Notice at least three (3) Business Days in advance to Zenlayer for approval, or fails to obtain Zenlayer's approval, any service availability issues caused thereby shall not be eligible for Service Level Credits. (ii) Exceeding Bandwidth Cap in Usage-Based Billing Without Applying for Support. For usage-based billing, the peak bandwidth is capped at 100 Mbps. If Customer's actual peak bandwidth exceeds 100 Mbps, Customer shall either change to bandwidth-based billing, or provide a written Bandwidth Support Application at least three (3) Business Days in advance to Zenlayer for approval. If Customer fails to submit the Bandwidth Support Application in advance or fails to obtain Zenlayer's approval, any service availability issues caused thereby shall not be eligible for Service Level Credits;
(g) Suspension or termination of the Service in accordance with the Agreement;
(h) DDoS or other network attacks, security incidents, or malicious activity not caused by Zenlayer, and any measures taken by Zenlayer to mitigate them;
(i) Services provided on a trial, proof-of-concept, promotional, or free-of-charge basis, and any period before the Service Activation Date (including the Acceptance Period);
(j) Customer's breach of the Agreement, including the acceptable use requirements in Section 3 of the MSA; or
(k) Acts or omissions of third parties not affiliated with Zenlayer.

4.4. Network Attacks. If Zenlayer detects a distributed denial-of-service (DDoS) or other network attack directed at, or originating from, any IP address, port, or Service used by Customer that, in Zenlayer's reasonable judgment, threatens or degrades Zenlayer's network or the services of other customers, Zenlayer may, at its sole discretion and without prior notice, take any measures it considers necessary to mitigate the attack, including filtering, rate-limiting, or null-routing traffic, or suspending the affected Service in accordance with Section 11.3 of the MSA. Zenlayer will notify Customer of any suspension as soon as practicable. Zenlayer is not liable for any measures taken under this Section, and any resulting Unavailability is excluded from Service Level Credits.

4.5. Maintenance. Zenlayer may interrupt or suspend the Services to maintain, repair, or upgrade its network, systems, or facilities (including cutovers, upgrades, and simulated fault drills). Zenlayer will give Customer reasonable prior notice of planned maintenance ("Scheduled Maintenance"). Where maintenance is required urgently to protect the network, the Services, or other customers ("Emergency Maintenance"), Zenlayer will give as much notice as is practicable in the circumstances. Zenlayer will use commercially reasonable efforts to minimize disruption to the Services. Consistent with Section 10.4 of the MSA, Scheduled Maintenance and Emergency Maintenance are not Service Outages and, subject to the twenty-four (24) hour limit on Scheduled Maintenance windows in the exclusions above, do not count as Unavailability for Service Level Credit purposes.

4.6. Sole Remedy. As provided in Section 10.3 of the MSA, the Service Level Credits set out in this SLA are Customer's sole and exclusive remedy, and Zenlayer's sole and entire liability, for any Unavailability, Service Outage, or other failure to meet the service levels described in this SLA. A Service Outage does not constitute a breach of, or default under, the Agreement. The Parties agree that Service Level Credits are a reasonable adjustment to the price of the affected Service reflecting its reduced value, and not a penalty.

5. **RESPONSE AND RESOLUTION TIMES.**

Zenlayer technical support is available 24 hours a day, 7 days a week, 365 days a year. Customer may request support by opening a support ticket through Zenlayer's customer portal or by email and, for Urgent priority requests, may also contact the Zenlayer support team by telephone. Zenlayer will assign each request a priority level based on its reasonable assessment of the impact on Customer's use of the Service. Customer will provide the information, access, and cooperation reasonably requested by Zenlayer to diagnose and resolve the request. An "event" in the table below means a hardware or power failure, a network interruption, or a Service Outage.

Zenlayer will use commercially reasonable efforts to respond to and resolve support requests within the following target time frames:

Priority	Initial Response Time	Resolution Time
Urgent – Progressed 24x7	30 mins	8 hours
High – Progressed 24x7	30 mins	48 hours
Medium –Progressed Monday-Friday business hours	30 mins	5 business days
Low –Progressed Monday-Friday business hours	30 mins	10 business days

Response and resolution times are measured from the time a support ticket is opened and are targets only. Resolution may include a temporary workaround that restores the Service. Failure to meet a response or resolution time does not entitle Customer to Service Level Credits or any other remedy.
